LOGISTICS OPERATIONS DASHBOARD

Fleet • Drivers • Delivery • Financial Performance Analysis

Prepared by: Abiodun Sonusi

Tools: Power BI | Excel | Canva

September 2026

Executive Summary

This Capstone project analyzes a multi-table logistics operations database to deliver clear insights on fleet efficiency, driver performance, delivery quality, and financial health using Power BI dashboards.

Key Focus

Fleet utilization, driver productivity, on-time delivery & cost control

Approach

KPI tracking, visual analysis, trend detection & relationship modelling

Outcome

Actionable insights for operations, workforce and financial strategy

Dataset Overview

Logistics Operations Database – 14 related tables

Core Entities

- Drivers
- Trucks
- Trailers
- Customers
- Facilities
- Routes
- Loads

Transactional & Metrics

- Trips
- Fuel Purchases
- Maintenance Records
- Delivery Events
- Safety Incidents
- Driver Monthly Metrics
- Truck Utilization Metrics

Four Dashboards – Scope & Focus

01

Fleet Health & Utilization

Asset performance, mileage, fuel efficiency and maintenance costs

Trucks • Miles • MPG • Fuel Cost • Maintenance • Gallons

02

Driver Performance

Workforce productivity, revenue contribution, safety and efficiency

Drivers • Trips • Revenue • Avg MPG • Incidents • Fuel Used

03

Delivery & Operations

On-time performance, detention time and operational quality

Loads • Events • On-Time % • Detention • Revenue • Routes

04

Financial Overview

Revenue, operating costs and overall profitability

Revenue • Fuel Cost • Maintenance • Profit • Avg Revenue/Load

Dashboard Overview

DATA ANALYST

Tools & Data Preparation

TOOLS USED

Microsoft Excel
Data cleaning & preparation

Power BI Desktop
Data modelling & dashboards

Power Query
Transform & combine tables

Canva
Final combined presentation image

PREPARATION STEPS

1. Converted all sheets to Excel Tables
2. Replaced missing IDs with “Unknown”
3. Standardized all date columns
4. Appended Fuel Purchase tables
5. Built relationships in Model View
6. Created DAX measures (Profit, Costs)
7. Designed consistent dark theme

Key Design Decisions

Data Model

Star-schema relationships
Trips as central fact table
Missing keys handled as Unknown
Measures for Profit & Operating Cost

Visual Design

Consistent dark navy + teal theme
KPI cards at the top of every page
Mix of Line, Column & Donut charts
Clean professional titles

User Experience

Year & status slicers on each page
Logical page navigation
Balanced layouts with clear hierarchy
Focus on actionable monthly trends

Thank You
