MULTIPLE TABLE SALES DASHBOARD

Sales Performance Analysis & Insights

Prepared by: *Abiodun Sonusi*

Tools: Power BI | Excel | SQL

September 2026

Executive Summary

This project analyzes multi-table sales data to identify revenue trends, customer behavior, and product performance across cities and categories.

Key Focus

Revenue drivers,
customer segments
& product mix

Approach

KPI tracking,
visual analysis
& trend detection

Outcome

Actionable insights
for growth and
customer strategy

Key Insights

1 Overall Performance

Total revenue reached ₦6M across 10 orders and 5 customers.
Average revenue per order stood at ₦605,000.
This result is heavily concentrated – one customer (Fatima Bello) alone delivered 4.1M (~66% of total revenue

2 Top Customers

Fatima Bello contributed the highest revenue (~4.1M). Top customers drive the majority of sales.
Fatima contributing such a high proportion of revenue represents a concentration risk that we need to resolve. Without her business will have no chance of meeting our target.

3 Category Mix

Furniture accounted for ~86% of revenue while Electronics made up the remaining ~14%.

4 City Trends

Kano led with the highest revenue, followed by Lagos. Abuja and PH showed lower contribution.

Business Problem

The company needs clear answers to guide sales strategy and resource allocation.

01

Revenue Leaders

Which products and categories generate the most revenue?

02

Customer Impact

Which customers contribute the largest share of sales?

03

Trend Patterns

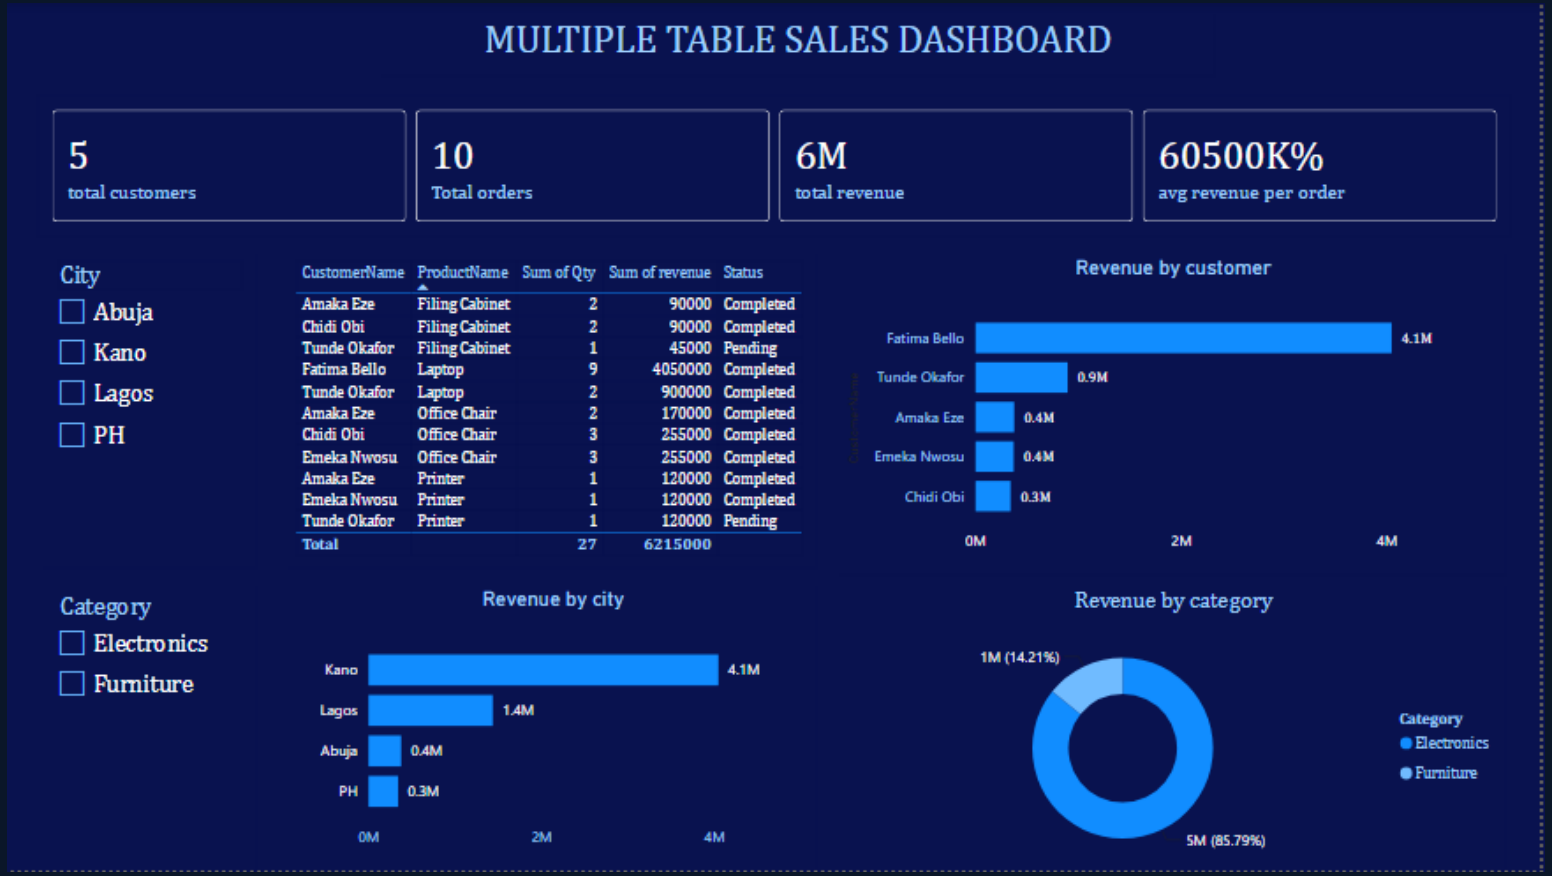

How does revenue trend across cities and over time?

04

Growth Areas

Where are the opportunities to increase sales performance?

Dashboard Overview

Detailed Sales Table

CustomerName	ProductName	Sum of Qty	Sum of revenue	Status
Amaka Eze	Filing Cabinet	2	90000	Completed

Tunde Okafor	Filing Cabinet	1	45000	Pending
Fatima Bello	Laptop	9	4050000	Completed
Tunde Okafor	Laptop	2	900000	Completed
Amaka Eze	Office Chair	2	170000	Completed
Chidi Obi	Office Chair	3	255000	Completed
Emeka Nwosu	Office Chair	3	255000	Completed
Amaka Eze	Printer	1	120000	Completed
Emeka Nwosu	Printer	1	120000	Completed
Tunde Okafor	Printer	1	120000	Pending
Total		**27**	**6215000**	

Recommendations & Next Steps

Focus on Top Customers

Create loyalty or retention programs for high-value customers (e.g. Fatima Bello and others).

Strengthen Category Performance

Investigate ways to grow the lower-share category while protecting the dominant one.

City-Level Strategy

Replicate successful approaches from high-performing cities in lower-performing locations.

Monitor Pending Orders

Reduce pending status volume to improve cash flow and customer satisfaction.

Conclusion

The analysis highlights the main revenue drivers, customer concentration, and geographic patterns. These findings can support management decisions on marketing focus, inventory planning, and customer relationship efforts.
